1. **Prompts**

Prompt 1 – Initial Build

"Build a simple interactive web page called 'Group Idea Board'. It should have a dropdown to select a name, a text input to enter an idea, and an 'Add Idea' button. When the button is clicked, the idea should appear in a list below in the format: 'Idea text – suggested by Name'. Use HTML, CSS, and JavaScript in a single index.html file."

Improve the Appearance

Prompt 2 – Style & Design

"Improve the visual design of this Group Idea Board page. Add better layout and spacing, a clean color scheme with a blue header, styled button, and a readable idea list. Make it look modern and professional."

Add Additional UI Elements

Prompt 3 – Extra Features

"Enhance the Group Idea Board by adding: a header section at the top with a title and short description, a footer at the bottom, a counter showing the total number of ideas submitted, and a clear button that resets the input field. Keep the design clean and consistent."

Testing Help

Prompt 4 – Bug Fix / Testing

"Review this Group Idea Board code and check if: ideas display correctly when added, the dropdown name appears properly in the list, and the clear button resets only the input. Fix any bugs you find."
